NUMBER 1/2

COMPUTER APPLICATIONS TO BATCH CHEMICAL PROCESSING

G. V. Reklaitis v Preface

Part A: Modeling Optimization and Control of Batch Units

D. Bonvin, P. de Vallière and **D. W. T. Rippin** 1 Application of estimation techniques to batch reactors—I. Modelling thermal effects

P. de Vallière and **D. Bonvin** 11 Application of estimation techniques to batch reactors—II. Experimental studies in state and parameter estimation

J. Dimitratos, C. Georgakis, M. S. El-Aasser and **A. Klein** 21 Dynamic modeling and state estimation for an emulsion copolymerization reactor

C. Filippi-Bossy, J. Bordet, J. Villermaux, S. Marchal-Brassely and **C. Georgakis** 35 Batch reactor optimization by use of tendency models

J. E. Cuthrell and **L. T. Biegler** 49 Simultaneous optimization and solution methods for batch reactor control profiles

G. D. Cawthon and **K. S. Knaebel** 63 Optimization of semibatch polymerization reactions

C. Kravaris, R. A. Wright and **J. F. Carrier** 73 Nonlinear controllers for trajectory tracking in batch processes

Short Note
R. S. Davidson 83 Using process information to control a multi-purpose batch chemical reactor

J. E. Merkle Jr and **W.-K. Lee** 87 Adaptive strategies for automatic startup and temperature control of a batch process

B. J. Cott and **S. Macchietto** 105 Minimizing the effects of batch process variability using online schedule modification

Part B: Design and Operation of Batch Plants

H. S. Wellons and **G. V. Reklaitis** 115 The design of multiproduct batch plants under uncertainty with staged expansion

A. K. Modi and **I. A. Karimi** 127 Design of multiproduct batch processes with finite intermediate storage

D. B. Birewar and **I. E. Grossmann** 141 Incorporating scheduling in the optimal design of multiproduct batch plants

A. Espuña, M. Lázaro, J. M. Martínez and **L. Puigjaner** 163 An efficient and simplified solution to the predesign problem of multiproduct plants

D. Rajagopalan and **I. A. Karimi** 175 Completion times in serial mixed-storage multi-product processes with transfer and set-up times

K. Kuriyan and **G. V. Reklaitis** 187 Scheduling network flowshops so as to minimize makespan

M. C. Wellons and **G. V. Reklaitis** 201 Optimal schedule generation for a single-product production line—I. Problem formulation

M. C. Wellons and **G. V. Reklaitis** 213 Optimal schedule generation for a single-product production line—II. Identification of dominant unique path sequences

R. F. H. Musier and **L. B. Evans** 229 An approximate method for the production scheduling of industrial batch processes with parallel units

C. H. White 239 Productivity analysis of a large multiproduct batch processing facility

I Softstrip® data strip containing the table of contents of this issue

NUMBER 3

i Softstrip® data strip containing the table of contents of this issue

T. R. Colmenares and **W. D. Seider** 247 Synthesis of cascade refrigeration systems integrated with chemical processes

Gh. Juncu and **R. Mihail** 259 Multigrid solution of the diffusion–convection–reaction equations which describe the mass and/or heat transfer from or to a spherical particle

R. Gani and **I. T. Cameron** 271 Extension of dynamic models of distillation columns to steady-state simulation

A. S. T. Chiang and **G.-W. Hwang** 281 Simulation of breakthrough curves by a moving zone collocation method

K. K. Trivedi, B. K. O'Neill and **J. R. Roach** 291 Synthesis of heat exchanger networks featuring multiple pinch points

K. Glinos and **M. F. Malone** 295 Net work consumption in distillation—short-cut evaluation and applications to synthesis

G. R. Kocis and **I. E. Grossmann** 307 Computational experience with DICOPT solving MINLP problems in process systems engineering

Y. K. Kao and **J. Weisman** 317 Numerical evaluation of the moving-front transition boiling model by global spline collocation

Short Note
M. Rashid and **I. D. L. Bogle** 327 Dynamic operability analysis and simulation of a CSTR with exothermic reaction

I Announcement

NUMBER 4/5

CHEMDATA 88—THE USE OF COMPUTERS IN CHEMICAL ENGINEERING

Urban Grén vii Introduction

Plenary Lectures

Kristian M. Lien 331 A framework for opportunistic problemsolving

Lawrence B. Evans 343 Simulation with respect to solid fluid systems

O. A. Asbjornsen 351 Control and operability of process plants

Arthur W. Westerberg 365 Synthesis in engineering design

J. D. Seader 377 Education and training in chemical engineering related to the use of computers

John Villadsen 385 Simulation of biochemical reactions

Session 1. Physico Chemical Properties

Rafiqul Gani and **John P. O'Connell** 397 A knowledge based system for the selection of thermodynamic models

Yunda Liu, Martin Wimby and **Urban Grén** 405 An activity–coefficient model for electrolyte systems

J. Rennotte, H. Massillon and **B. Kalitventzeff** 411 A new model for the simulation of the behaviour of electrolytic aqueous solutions. Comparison with three well-known previous models

H. Theliander and **U. Grén** 419 A simple algorithm for the estimation of the density of aqueous solutions containing two or more different salts

Session 2. Simulation

G. Maria and **G. Musca** 425 ARS efficiency for solving model estimation–reduction problems

S. Kaijaluoto, P. Neittaanmäki and **J. Ruhtila** 433 Comparison of different solution algorithms for sparse linear equations arising from flowsheeting problems

G. Biardi and **M. G. Grottoli** 441 Development of a new simulation model for real trays distillation column

L. Cremades, A. Mulet and **B. Koehret** 451 A file oriented information system for the cost estimation of equipment and the economic evaluation of chemical processes

Session 3. Artificial Intelligence and Expert Systems

H.-D. Engelmann, H.-H. Erdmann, R. Funder and **K.-H. Simmrock** 459 The solving of complex process synthesis problems using distributed expert systems

E. Lahdenperä, E. Korhonen and **L. Nyström** 467 An expert system for selection of solid–liquid separation equipment

Session 4. Solid Systems

Tariq F. Al-Fariss 475 A new correlation for non-Newtonian flow through porous media

Session 5. Simulation Involving Reactors and Batch Systems

Antonio Espuña and **Luis Puigjaner** 483 On the solution of the retrofitting problem for multiproduct batch/semicontinuous chemical plants

E. S. Lee and **G. V. Reklaitis** 491 Intermediate storage and operation of batch processes under batch failure

E. Reuter, G. Wozny and **L. Jeromin** 499 Modeling of multicomponent batch distillation processes with chemical reaction and their control systems

L. Pellegrini, G. Biardi and **E. Ranzi** 511 Dynamic model of packed-bed tubular reactors

Said Irandoust and **Bengt Andersson** 519 Simulation of flow and mass transfer in Taylor flow through a capillary

L. M. Király, F. Friedler and **L. Szoboszlai** 527 Optimal design of multi-purpose batch chemical plants

Session 6. Process Control

A. Raza, D. M. Espie, K. Gaskill and **T. Slater** 535 The integration of data management and data reconciliation for central plant monitoring

D. R. Lewin 545 ProCoSP a PC CAI and CAD tool for SISO control synthesis

Session 7. Biotechnology Systems

Demetri Petrides, Charles L. Cooney, Lawrence B. Evans, Randall P. Field and **Mark Snoswell** 553 Bioprocess simulation: an integrated approach to process development

Session 8. Dynamic Simulation and Control

Rafiqul Gani and **Ganka Toneva** 563 Simultaneous steady state and dynamic simulation of chemical processes

S. Macchietto, G. Stuart, T. A. Perris and **G. R. Dissinger** 571 Monitoring and on-line optimisation of process using SpeedUp

H. Pingaud, J. M. Le Lann, B. Koehret and **M. C. Bardin** 577 Steady-state and dynamic simulation of plate fin heat exchangers

Session 9. Process Synthesis

J. A. Bandoni, A. M. Eliceche, G. D. B. Mabe and **E. A. Brignole** 587 Synthesis and optimization of ethane recovery process

B. Csukás, Z. Kozár and **P. Árva** 595 Multicriteria valuated Prolog synthesizing algorithms

François Maréchal and **Boris Kalitventzeff** 603 SYNEP1: a methodology for energy integration and optimal heat exchanger network synthesis

A. Krasławski, A. Górak and **A. Vogelpohl** 611 Fuzzy dynamic programming in the synthesis of distillation column systems

I Softstrip® data strip containing the table of contents of this issue

NUMBER 6

G. V. Reklaitis i Announcement—Best Paper of 1987

J. Lapointe, B. Marcos, M. Veillette, G. Laflamme and **M. Dumontier** 619 BIOEXPERT—an expert system for wastewater treatment process diagnosis

W. Morton and **G. J. Smith** 631 Time delays in dynamic simulation

B. W. Bequette and **T. F. Edgar** 641 Non-interacting control system design methods in distillation

M. Bezzina, L. Pibouleau and **S. Domenech** 651 A statistical approach to the synthesis of separation sequences

G. J. Siri, M. A. Galan and **B. J. McCoy** 661 Moment analysis for stirred-tank batch adsorption with nonlinear isotherm

K. K. Trivedi, B. K. O'Neill, J. R. Roach and **R. M. Wood** 667 A new dual-temperature design method for the synthesis of heat exchanger networks

G.-C. Shen and **W.-K. Lee** 687 A predictive approach for adaptive inferential control

A. R. Ciric and **C. A. Floudas** 703 A retrofit approach for heat exchanger networks

J. Lee and **W.-K. Lee** 717 Least squares updates for quasi-Newton methods in process design and simulation

I. Marsi, P. Fejes and **K. Varga** 725 Simulation of an adiabatic contact catalytic reactor

V. G. Dovi and **O. Paladino** 731 Fitting of experimental data to implicit models using a constrained variation algorithm

I Corrigendum

III Softstrip® data strip containing the table of contents of this issue

NUMBER 7

i Softstrip® data strip containing the table of contents of this issue

G. D. Cera 737 Parallel dynamic process simulation of a distillation column on the BBN Butterfly parallel processor computer

M. R. Blaha, N. L. Eastman and **M. M. Hall** 753 An extensible AE&C database model

E. C. Martinez and **B. Drozdowicz** 767 Multitime-scale approach to real-time simulation of stiff dynamic systems

J. R. Quan and **C. T. Chang** 779 New insights in solving distributed system equations by the quadrature method—I. Analysis

M. Hillestad, C. Sørlie, T. F. Anderson, I. Olsen and **T. Hertzberg** 789 On estimating the error of local thermodynamic models—a general approach

G. R. Kocis and **I. E. Grossmann** 797 A modelling and decomposition strategy for the MINLP optimization of process flowsheets

R. D. Colberg, M. Morari and **D. W. Townsend** 821 A resilience target for heat exchanger network synthesis

D. Mocsny and **R. Govind** 839 Multiple-feed, pure-product separation system synthesis

S. Narasimhan and **R. S. H. Mah** 851 Treatment of general steady state process models in gross error identification

B. K. Harrison 855 Performance of a process flowsheeting system on a supercomputer

Short Note

S. Pethe, R. Singh and **F. C. Knopf** 859 A simple technique for locating loops in heat exchanger networks

I Announcement

NUMBER 8

i Softstrip® data strip containing the table of contents of this issue

M. E. Hanyak Jr 861 A user-friendly input language for design variables

P. L. Mills and **M. P. Duduković** 881 Convolution and deconvolution of nonideal tracer response data with application to three-phase packed-beds

A. B. Coon and **M. A. Stadtherr** 899 Parallel implementation of sparse *LU* decomposition for chemical engineering applications

Q. Yu and **N.-H. L. Wang** 915 Computer simulations of the dynamics of multicomponent ion exchange and adsorption in fixed beds—gradient-directed moving finite element method

B. Toftegård and **S. Bay Jørgensen** 927 An integration method for dynamic simulation of cycled processes

G. Pagani, A. d'Arminio Monforte and **A. de Mitri** 931 Improving an equation-oriented package

M. G. Harsh, P. Saderne and **L. T. Biegler** 947 A mixed integer flowsheet optimization strategy for process retrofits—the debottlenecking problem

J. Mydlarz and **A. G. Jones** 959 On numerical computation of size-dependent crystal growth rates

G. F. Barreto and **G. D. Mazza** 967 On the use of incremental quotients in Michelsen's method for stiff ordinary differential equations

NUMBER 9

i Softstrip® data strip containing the table of contents of this issue

B. J. Cott, R. G. Durham, P. L. Lee and **G. R. Sullivan** 973 Process model-based engineering

C. Gutierrez-Cañas, P. L. Arias and **J. A. Legarreta** 985 Industrial nitrogen oxides absorption simulation

E. N. Pistikopoulos and **I. E. Grossmann** 1003 Optimal retrofit design for improving process flexibility in nonlinear systems—I. Fixed degree of flexibility

J. R. Quan and **C.-T. Chang** 1017 New insights in solving distributed system equations by the quadrature method—II. Numerical experiments

G. Nagel and **G. Kluge** 1025 Non-isothermal multicomponent adsorption processes and their numerical treatment by means of integro-differential equations

M. Lázaro, A. Espuña and **L. Puigjaner** 1031 A comprehensive approach to production planning in multipurpose batch plants

N. V. Sahinidis, I. E. Grossmann, R. E. Fornari and **M. Chathrathi** 1049 Optimization model for long range planning in the chemical industry

G. R. Carmichael, D. M. Cohen, S.-Y. Cho and **M. H. Oguztuzun** 1065 Coupled transport/chemistry calculations on the Massively Parallel Processor computer

Gh. Juncu, V. Lavric and **R. Mihail** 1075 A comparison between the insensitive Runge–Kutta, the semi-implicit extrapolation and the backward differencing methods in solving the ODE systems which describe the radical hydrocarbons pyrolysis

M. B. Bogacki, K. Alejski and **J. Szymanowski** 1081 The fast method of the solution of a reacting distillation problem

NUMBER 10

i Softstrip® data strip containing the table of contents of this issue

E. N. Pistikopoulos and **I. E. Grossmann** 1087 Optimal retrofit design for improving process flexibility in nonlinear systems—II. Optimal level of flexibility

J. S. Hsiao and **L. W. Bezanson** 1097 Offset elimination properties of adaptive/predictive controllers

Y. Muslu and **H. A. San** 1105 Design parameters for multi-stage waste treatment

C. A. Floudas, A. Aggarwal and **A. R. Ciric** 1117 Global optimum search for nonconvex NLP and MINLP problems

C. A. Floudas and **A. R. Ciric** 1133 Strategies for overcoming uncertainties in heat exchanger network synthesis

T. Westerlund and **T. Hoikka** 1153 On the modeling of mineral fiber formation

A. Gawdzik and **L. Rakowski** 1165 The methods of analysis of the dynamic properties of the adiabatic tubular reactor with switch flow

G. Cesari, M. Fermeglia, I. Kikic and **M. Policastro** 1175 A computer program for the dynamic simulation of a semi-batch supercritical fluid extraction process

A. H. Al-Elg and **A. Palazoglu** 1183 Modeling and control of a high-purity double-effect distillation column

Y. Shimizu 1189 A plain approach for dealing with flexibility problems in linear systems

NUMBER 11/12

PSE'88—THIRD CONFERENCE ON PROCESS SYSTEMS ENGINEERING

J. D. Perkins and **M. L. Brisk** v Introduction

R. Benson 1193 Process systems engineering: past, present and a personal view of the future

R. L. Motard 1199 Integrated computer-aided process engineering

W.-K. Chan and **R. G. H. Prince** 1207 Heuristic evolutionary synthesis with non-sharp separators

B. Chen, J. Shen, Q. Sun and **S. Hu** 1221 Development of an expert system for synthesis of heat exchanger networks

T. Weatherill and **I. T. Cameron** 1229 A prototype expert system for hazard and operability studies

E. S. Lee and **G. V. Reklaitis** 1235 Intermediate storage and the operation of periodic processes under equipment failure

J. W. Ponton, E. M. Johnston, J. M. Forsyth, A. Matheson and **F. M. Rutherford** 1245 Real time dynamic simulation using networked computers

M. Hofmeister, L. Halasz and **D. W. T. Rippin** 1255 Knowledge-based tools for batch processing systems

B. J. Cott and **S. Macchietto** 1263 An integrated approach to computer-aided operation of batch chemical plants

N. Katoh, K. Nakao and **M. Hanawa** 1273 Learning control of a batch reactor

I. D. L. Bogle and **M. Rashid** 1277 An assessment of dynamic operability measures

T. Takamatsu, I. Hashimoto, M. Ohshima, J. Chu and **J.-C. Wang** 1283 Robustness degree based controller design for a class of nonlinear systems

R. J. Lojek and **B. D. Whitehead** 1291 Integrated advanced control and online optimization in olefins plant

K. Fukuda, K. Okamoto, E. Fukui and **H. Nishitani** 1299 Modeling and control system design of natural gas supply system

O. A. Asbjornsen 1309 PSE'88 in the light of modern systems engineering—a symposium review
